

# CHIKKO

Since 1924

Chikko  
Corporation  
Company Profile

Your best partner  
in the distribution of dangerous goods.

—— Established in 1924, build an era from the harbor ——

Be possible

because “Chikko” of dangerous goods distribution.

Since Chikko Corporation was established, we have been always focusing on “what customers seek from our service”. In the specialized field of dangerous goods logistics, we respond to various needs from customers, storage from 1 drum can to nationwide, and door to door logistic services for the world. We have pursued the ways to contribute to optimization and efficiency for the stream liken of dangerous goods.

Experiences that have been cultivated over 90 years since foundation and various solutions deriving from those experiences are our utmost strengths.

We mean warehousing business as “active” business that undertakes a significant line of physical distribution, not “quiet” business that is usually associated with storage business. How can we make the line of distribution beautiful. Proposals that only we can offer are here.

■ This is the view of Kobe Port from headquarters/  
The history of Chikko is in conjunction with a dynamic harbor.  
We will not forget the thought of “we were built from harbor”.

# Nisaburo Setoguchi

## PRESIDENT MESSAGE

### To meet customers' expectation.

We have shown our strength of logistics for dangerous goods in a specialized market and built a long history from it, we have and will always seek and offer new proposals, not being satisfied our present services. We offer flexible services that correspond to the needs of generation, and we hope to be a selected company for our quality. In this generation of turbulent times, there would be no more pleasure if our offer and proposals are helpful and useful for customers.

### Our incentive is a hope to be a “selected company.”

When my grandfather established Chikko Corporation in 1924, but there was no drum can using by people, but only a wooden keg, and that is why people avoided oils logistics jobs because they feared that oils such as petroleum would “leak out.” As he found the needs for this situation, this long history of ours have lasted until today although Chikko had not been a company that deals with warehousing dangerous goods at all times. Our company core for business has constantly transformed in order to respond to customers' needs. Our current business style was first established in the latter Showa period, which means that our history is relatively new in this sense. We are sure that our know-how with long history that produces diverse solutions is one of the greatest strength of our company. We put our customers' needs on the top requirement of our services that leads to our strong

corporate philosophy. Although we are widely recognized as “Chikko of warehouse for dangerous goods,” our business core is shifting from warehousing business to “comprehensive logistic service for dangerous goods.” In order to strengthen this feature, we are currently pursuing and tackling multifunction of each branch of logistics for dangerous goods, and expansion of network for nationwide and overseas.

Chikko is the company that was built from harbor. Each of our branches in Kobe, Yokohama, and Nagoya has accomplished different types growth respectively. We believe that we have always been observed as well as been supported by them. This is the reason that we hire and accept employees of diverse originality, and regard their individual growth after joining our company, which is our principle of employment. Since our business is

highly specialized, we expect employees to have expertise of dangerous goods and language proficiency. However, we do not set these skills as requirements as we believe that employees who we think are capable of “growing together” will be able to offer new solution depending on the needs of customers and generation. We also think that it is one of the most importance for our company to train our employees with these capabilities.

As we look at our business from overall logistic business, our market can be a niche market. Even in the niche market, we are needed as long as there is the fact that customers and society have “needs.” We promise you to be your partner and selected company for the logistic of dangerous goods and try our best.

#### Profile

- He became a president when he was 27-year-old. He has been responsible for the president industry for a long time. He is eager to build a completed style in the current business style as he will be at the age of 60 in 2024, which is the 100th anniversary of Chikko.

# Your best partner in the distribution of dangerous goods.

[Topics] Since 1924

**Move hand in hand with vibrant bay-area.**

## Founded in 1924.

Chikko Corporation has the best achievements and experiences in domestic handling of dangerous goods including petrochemical products. Not only harbor logistics network and storage businesses covering by 6 main domestic ports, but also we prepare warehouse facilities that include heating and refilling. In addition, we are prepared for transport planning, performance, and safety management.

## CHIKKO Corporation

### Make the next evolution forward for 100 years founded.

Chikko Corporation has been seeking for answers for various needs of customers since established in 1924 with the slogan of "Your best partner in the distribution of dangerous goods." Particularly, we have certain achievements and long history for various dangerous goods including petrochemical products in harbor transportation industry, warehouse industry, customs clearance industry to manage import and export cargoes. We support not only transportation and storage for safety and security, but also versatile needs including special work such as heating, refilling and consolidation service.

In Japan nationwide, it also covers the 6 major ports logistics which enables to provide the best logistics route cultivated through history. In addition, high demand for international logistics is growing in Japan, China and Korea. In 2008, the company established the "Chikko Shanghai Corporation" in Shanghai. We realize integrated transport service including

customs clearance in China.

We are promoting differentiate of further service by multifunction of dangerous goods distribution towards the 100th anniversary of our founding in 2024. In Yokohama Chemicals Center expanded for a constant temperature storehouse. Moreover, we have been established dangerous goods warehouse in Yatomi, Nagoya district. In Kobe district also expanded capacity by scrap & build.

In addition, it is certified as an AEO accredited customs broker, which is the fifth company in Kobe Customs Office and the 20th company in the whole country, and we have certain permission for cargo security management and regulatory compliance system. Furthermore, following the ISO9001 quality management system acquired in 1997 prior to the industry, we also acquired the ISO14001 environment management system in 2012. We all of the preparation for provide safety and security to the customers.

# Solution by CHIKKO

We provide total solution including dangerous goods transport planning,  
safety management and special working.

Recently, opportunities for transportation of small cargo in the logistics industry are increasing,  
and there is a rapid change in the multi-modal of the means of transportation  
and internationalization in the range of transport.

We respond promptly to deal with these changes and make efforts for the expansion of port transport and storage services.

We construct a system to respond to diverse needs of customers and provide you  
with total solution based on our longstanding know-how through multifunction bases  
for the distribution of dangerous goods, the expansion of consolidated services,  
and strengthening domestic and international network.

# Network

Covering 6 major harbor (Tokyo, Yokohama, Nagoya, Osaka, Kobe and Moji)

## Kansai Block

- Yatsusiro Warehouse

## Chikko corresponds to anywhere in Japan by one point of contact.

Chikko sales offices and customs offices cover by 6 major harbor in Japan. Each office are closely linked to bonded facilities such as bonded warehouse and dangerous goods warehouse and establish close domestic network, which enables rapid response in the domestic transport. In addition, we also collaborate with affiliated company and achieved disposal, storage and transportation. It is our one and only service that enables correspondence in anywhere in Japan by one point of contact.

In 2012, Chikko established new warehouses in Yokohama and Nagoya in order to provide customers with more qualified services. We are working on strengthening domestic network as well as multifunctionalization of each branch in order to enrich the lineups that are selected by customers.

Yokohama Chemicals Center/ The biggest storage houses in Chikko Corporation of East of Japan and also expanded a new warehouse in 2012.

Port-Island Chemicals Center/ Opened in 1998 by borrowing the site from Kobe city. We are working on a large size by scrap & build.

## Expanded International Network

Shanghai

Ho Chi Minh

In January, 2008, Chikko established a 100% owned subsidiary, "Chikko Shanghai Corporation" in Shanghai as a base for China dangerous goods logistics, and started forwarding business. We also established "CHIKKO VIETNAM CO., LTD" in Hochiminh Vietnam, in October, 2017. We undertake every transaction including "warehouse storage", "customs clearance procedure", "document preparation on site", "delivery to the user", etc. concerning dangerous goods and chemical as the second overseas base.

## Capable of handling a wide range of hazardous materials

### [ Dangerous Goods Warehouse ]

Our strength is handling various dangerous goods and chemicals especially petrochemical products among import and export cargo. For the storage of dangerous goods, there are a number of issues to be cleared in accordance with laws and regulations, where, in many cases, only Fire Service Law 4 is applied. However, we are able to store cargoes which are Category 1 to Category 5 in Yokohama, Nagoya, and Kobe. Our greatest strength is that we have cleared storage and security standards defined by the Fire Prevention Law in a wide range of fields and accumulated know-how for many years.

We have dangerous goods warehouses in major areas such as Yokohama, Nagoya, and Kobe. It is our unique strength of the Chikko Corporation that handles a wide range of dangerous goods.

### An Enhancement for Packing Service [ Logistic Processing ]

Not only the storage of various cargoes including dangerous goods and the transport business, we also conduct sorting, inspection, labeling and packaging. We do total support for customers including detailed work.

The manufacturing, importing, selling, storing and transporting of poisonous and deleterious substances are severely restricted by the "Poisonous and Deleterious Substitution Control Law" from the aspects of health hygiene. At Chikko, we have qualified people who are able to handle poisonous materials and manage them according to the procedure that complies with the Control Law such as antitheft.

### General Selling Business, Manufacturing Industry Registration [ Storage of Poisonous Materials ]

## 03

### Aiming for More Efficiency

#### [ Automatic Warehouse ]

Established a state-of-the-art automated warehouse at Yokohama Chemicals Center. In addition to the benefits of higher storage efficiency than conventional dangerous goods warehouse, it is also able to conduct the location management of inventory cargo, which can respond flexibly to the small quantities of various types of trends to meet the needs of customers.

## 02

### Storage Cargo at 5 to 25 degrees

#### [ Constant Temperature Warehouse ]

Please leave the storage of objects that degrade quality as temperature and humidity change. In order to maintain its quality at Chikko, there are substantial warehouses that can be stored in a certain range of temperature and humidity, and we are able to keep it according to the characteristics of the products.

## 05

### We are Proud of Our Large Capacity

#### [ Storage for Tank Container ]

We are able to storage a wide variety of tank container such as Category IV Class I petroleum to IV (flash point 0 degrees and more ) of the Fire Prevention Law and oil extracted from animals and plants etc. In addition to temporary storage and transportation, we support special work such as warming, truck loading and refilling.

## 04

### Managing the Small Quantities of Various Types of Cargo by Movable rack

#### [ Ordinary Objects Warehouse ]

We are enhancing equipped with ordinary goods warehouses, it is compatible with small quantities of various types of cargoes with movable racks, as well as packaging and other services. We are sure that we can respond to client's need to import and export dangerous goods and ordinary objects simultaneously.

#### Inside Company Information Control

Chikko constructs a database of handling information on cargoes accumulated at each workplace and share within business office nationwide. As a result, similar data and latest information can also be reliably handled. We provide highly reliable information services standardized at any business office nationwide.

#### Cooperation With Customers

In addition, we have introduced a system that can provide information to customers in real time, and professional staffs support customers at any time. It is possible to utilize this network in warehouse management, customs clearance and billing etc.

#### Barcode Entering and Dispatching System

#### [ System Control ]

The human error may occur although we did our best for the inspection work. Thereby, some warehouses have adopted a barcode entering and dispatching system to make sure that possibility of human error is decreasing to zero and for more accurate inspection.

## 03

# New Expansion Of Chikko

April, 2012, we build “Multi Work Station (MWS)” in Yokohama Chemicals Center. It is able to make mutual filling, warming and storage (Fire law category II・category IV) to tank container, lorry and drum. Since then, we were setting same facilities in Nagoya, Kobe, and Kita kyushu therefore we were able to respond to the various needs of customers, as well as further improve the efficiency of our distribution system.

It is possible to refill work such as ISO tank container, drum can and tank truck at Multi Work Station.

## To be a “Selected Company”, we are continuing a new challenge.

Based on mid to long term planning, we are expanding variety of facilities and services for anticipatory investment stances. In Yokohama district, we acquired 16,500 square meters of land adjacent to the Yokohama Chemicals Center Warehouse2. We also established a dangerous goods warehouse and normal temperature dangerous goods warehouse in 2012.

In addition, one of our unique services for expansion heating equipment of ISO tank container, as well as refill from the ISO tank container to the tank truck and the “Multi Work Station” to perform the reverse work has been established. We want to be a company that can be chosen by customers as a logistics company that specializes in hazardous materials. We believe that running new facility including “Multi Work Station”, NVOCC and consolidated service for “assortment of objects” could make differentiation with other companies.

## Expansion of Network to South East Asia [ NVOCC of Chikko ]

**International network spreading more and more, including local subsidiaries in China and Vietnam.**

Since 2010, the service for Hong Kong is in full swing, and we are able to issue the BL (Bill of Lading) of FCL (Full Container Load) to Southeast Asia in 2012 as well as NVOCC (Non-Vessel Operating Common Carrier) service is now available in Asia including Taiwan, Malaysia, Thailand, Indonesia and Vietnam.

### Chikko Consolidated Service

We provide you with consolidated service of LCL cargo (small cargo).

We are expanding our services to South East Asia from Yokohama harbor and Kobe harbor, and currently we provide services for Shanghai, Hong Kong, Pusan, Singapore, and Ho Chi Minh. Moreover, we will expand a network within Asian countries in the nearly future.

## Expanding Capacity Handled by Collaboration

**To support various needs of customers and meet the demand of dangerous goods warehouse, we continue to expand our business with other companies in the same industry.**

Since there was no dangerous goods warehouse for business in Minami Kyushu, we opened a dangerous goods warehouse in Yachiyo City, Kumamoto prefecture, utilizing the facilities of our partner company in 2016. In 2017, we established Sakurajima Office in Osaka Sakurajima Futo. We utilize the facilities of the business partners and started a collaborative scheme to entrust work. We are expecting the increases in strengthening of capacity due to less supply of dangerous goods warehouse to the demand in Osaka.

It is possible to heat the drum can by using a heating cabinet and heating tank. In a steam heating cabinet, it is possible to heat 54 drums of 200 liter drums and 4 drums in a warm water heating tank at once.

There is also heating equipment for the ISO tank container, and ISO tank container steam heating and hot water heating are possible at the same time.

# CHIKKO's Promise for Customers

Our mission is to deliver "safety and security" therefore we constantly review our business from various perspectives such as quality improvement, risk management and compliance systems.

## Only things that we can do to respond to customers' reliance.

Starting from dangerous products, promising "safety and security" for customers is the most important matter for us as we receive cargo that requires special attention.

We not only focus on the concept of "disaster prevention" that promises not to cause an accident, but also anticipating possibilities of natural disaster, and minimizing the damage from disaster, which is called disaster management or mitigation. At Chikko, we put strong focuses on the undoubted know-how on our affluent achievement on dangerous cargoes and constant development on the business. We constantly review our business from various perspectives such as improvement on quality, environmental management, management on risks, information

utilization, and compliance in order to continue making sure that we deliver "safety and security." With this in mind, we hope that we become a company that customers hope to choose and society requires.

Our company style is every member of employees "consider" better solution. We always expand active discussions at office.

Executive Managing Director and Corporate Planning Division Manager  
**Toshiro Shibayoshi**

We think that education for employees is the company's significant mission, and we work to train our employees that respond to customers' reliance.

## Efforts for compliance

Notification of Authorization  
by Kobe Customs

### Authorized Economic Operator

Chikko was authorized as AEO authorization customs clearance traders at the 5th company in the Kobe customs place and 20th company nationally.

Chikko is an AEO authorized customs clearance traders. The AEO is granted to customs agencies that are certified by the customs commissioner as parties with a framework for cargo security management and compliance systems in place. Therefore, Chikko is able to provide our customers with greater convenience in obtaining cargo before tax declaration.

## Efforts for risk management

Firefighting drill with Kobe fire department. It is inevitable to cooperate with community in case of emergency.

As well as being ready for establishing a system to prevent disaster or accidents beforehand, we incorporate the concept of "disaster prevention" that minimize the damages. We regularly practice fire fight drills under the assumption of actual disasters.

## Efforts for quality and environment

### ISO9001

Chikko obtained attestation of ISO9002 (integrated into ISO9001 later) in 1997. We conduct strict quality management that is based on the quality guaranteed system by meeting the standard. We also practice safest risk management under the assumption of various situation regarding storage and shipment of each type of dangerous products.

### ISO14001

At Chikko, we have made efforts to actively implement environmental management as we think that tackling environmental problems is our obligation. Our efforts led to accomplishing in meeting the standard of ISO, and we obtained the attestation of ISO14001 in 2012.
